Final Comments: (bullet or paragraph form)

1. The writer draws the characters well.
2. The structure is tight. The writer sets up the goal and then the characters go about overcoming obstacles to do just that...classic.
3. The writer uses the location so well that it becomes a supporting character.
4. The writer is very good at introducing a "cast of thousands" but not overwhelming us with so many characters that are necessary to the spine of the story.
